

Mendoza, Argentina. August 22, 2023

Aniridia Europe

Dear President Mrs Barbara Poli, and board of Directors:

My name is Raúl Luis Guillot and I am pleased to contact you to inform you about the creation of the Argentine Aniridia Association, which I currently preside.

This association was born this year, in the city of Mendoza, with the support of family and friends, with the intention of growing and relating to associations in other countries, to improve access to information, advances in diagnosis and treatment. and to the resources that facilitate the daily life of those affected by this pathology.

The objectives we seek when creating it are:

- Establish a meeting area between people interested in Aniridia because they suffer from it or because they are relatives of someone affected.
- Share experiences and concerns related to the diagnosis, treatments and characteristics of the disease.
- Serve as a link between the affected people and between them and the institutions.
- Offer support and information especially to parents of recently diagnosed children.
- Guide those affected as to the available resources.
- Inform and facilitate access to technologies that can help overcome the difficulties of the condition.
- Promote research and specialization in Argentina on issues related to the disease.
- Create a support network for patients, family members and doctors who wish to be informed and give visibility to this rare disease.

Undoubtedly, our project can be enriched and benefited with your support, interest and dissemination, as well as with the collaboration that your institution deems appropriate.

We are open to receive any questions you want to ask us.

Our website is: <https://aniridiaargentina.com.ar>, through which we can establish contact and that we would appreciate if you could disseminate.

Without another particular, I want to extend a sincere thank you on behalf of myself and the board of directors

Sincerely,

Raul Luis Guillot. President.
